SUMMARY

- ❖ Software engineer skilled in Vue.js, TypeScript, SCSS, and NestJS.
- ❖ Experience with both front-end and backend application development.
- ❖ Effective collaborator with strong communication skills and a positive influence on team morale.
- ❖ Always up for new challenges and continuous learning.
- ❖ Seeking opportunities in Sydney

EXPERIENCE

Jul 2022 – Jul 2023

Software Engineer | Pathzero

- Implemented and maintained front-end applications using Vue 3 (with composition API), Typescript, and SCSS.
- Managed backend applications using NestJS, ensuring efficient functionality and smooth operations.
- Worked closely with designers to build a cohesive design system using Storybook, improving user interface consistency across projects.
- Actively contributed to complex projects for both internal operations and external clients, showcasing strong technical and problem-solving skills.
- Transitioned effectively between multiple teams, adapting to different products and swiftly adjusting to different code environments.
- Highly regarded for excellent communication skills and positive influence on team morale, fostering a collaborative environment.
- Continually embraced challenges and sought opportunities for personal and professional growth.

Mar 2022 – Jul 2022

Software Engineer Intern | Pathzero

- Initially joined Pathzero as a software engineer intern, quickly learning and adapting to the company's tech stack.
- Developed and maintained front-end applications using Vue 2, Javascript, Typescript, and SCSS, demonstrating an ability to quickly grasp new technologies.
- Showcased problem-solving skills and eagerness to embrace challenging tasks, leading to a promotion to a full-time software engineer role.

SKILLS

- VUE.JS • TYPESCRIPT
- NESTJS • SCSS
- TEAMWORK • QUICK LEARNER
- CREATIVE PROBLEM SOLVING
- ATTENTION TO DETAIL
- COMMUNICATION
- ADAPTABILITY
- POSITIVE ATTITUDE

EDUCATION

2016 - 2021

Macquarie University

Bachelor of Arts and Science

Japanese studies, Computing

2019 - 2020

Sophia University

Exchange program

Japanese studies, Programming

Project Manager/Team Leader | FreshTracks

Contracted by FreshTracks to build a web dashboard for their system through Macquarie University's PACE work experience program.

- Managed a small team in planning and developing the project, ensuring deadlines were met to a high standard.
- Provided weekly updates to sponsors and maintained clear communication to ensure their requirements were met.
- Created a visual dashboard using PHP, JavaScript, HTML, CSS and SQL.
- Utilised a feedback loop to ensure design strategies met requirements to a high standard
- Conducted research into design strategies to determine best practices
- Created weekly reports and conducted frequent meetings to promote communication within the team and ensure everyone was on the same page.
- Created and managed project documentation including a Feasibility Report, Software Requirements Specification documentation, Design documentation and Testing documentation.
